THE ARCH NEWSLETTER

AUGUST 2024

NEWS

CONGRATULATIONS TO CHING WONG, THE RECIPIENT OF ARCH'S 2024 CHRISTOPHER N. H. JENKINS CANCER CONTROL AWARD

As Executive Director of the Vietnamese Community Health Promotion Project, Mr. Wong created Vietnamese language health promotional materials and led community-engaged research projects to test their efficacy for over 25 years. Through ARCH research projects, he extended this work to Chinese, Filipino, Hmong and Korean communities. More details forthcoming regarding Jenkins Award activities to celebrate Mr. Wong's outstanding contributions through his career.

**Congratulations to the recipient of the
2024 Jenkins Award, Ching Wong!**

More details to come.

DR. VAN TA PARK AMONG TOP UCSF NIH FUNDING RECIPIENTS IN 2023

ARCH member Dr. Van Ta Park, professor in Community Health Systems at UCSF School of Nursing, has ranked 6th among all UCSF recipients for total NIH funding in 2023, receiving \$6.7 million. Dr. Park's research addresses issues related to racial and ethnic minority health and health care disparities, especially among Asian Americans and Pacific Islanders, through community-based participatory research.

GRANTS

DR. ANTHONY BUI RECEIVES ACADEMIC PEDIATRIC ASSOCIATION RAPID GRANT AWARD

ARCH member Dr. Anthony Bui received the Academic Pediatric Association (APA) [Research in Academic Pediatrics Initiative on Diversity \(RAPID\) award](#) on the American Board of Pediatrics Foundation – Behavioral Health Equity for a project entitled “Beliefs and Attitudes about Facilitators and Barriers to Mental Healthcare Among Vietnamese American Youth and their Parents.”

DR. JANET CHU RECEIVES UCSF INSTITUTIONAL KL2 CAREER DEVELOPMENT AWARD

ARCH internship director Dr. Janet Chu has received an institutional KL2 career development award for “Exploring Patterns and Risk Factors for Progression of Metabolic Dysfunction-associated Steatotic Liver Disease (MASLD) in Diverse Populations” with primary mentor Dr. Salma Shariff-Marco and co-mentor Dr. Mandana Khalili.

ANNOUNCING ASPIRE: THE FIRST ASIAN AMERICAN COHORT STUDY FOR CANCER RESEARCH

Led by principal investigators Drs. Scarlett Gomez, Iona Cheng and Salma Shariff-Marco, ASPIRE is the first Asian American cohort study for cancer research funded by the National Cancer Institute. Several ARCH members are co-investigators or advisors on this cohort study. Please stay tuned as ASPIRE will engage with the ARCH community for input as the project advances.

The first Asian American cohort study for cancer research

*Principal Investigators:
Scarlett Gomez, Iona Cheng, Salma Shariff-Marco*

WHY DO WE NEED AN ASIAN AMERICAN COHORT STUDY?

1. Asian Americans are the fastest growing and most diverse racial group in the U.S.

- Asian Americans have doubled in population since 2000
- They represent over 30 countries and speak over 100 languages and dialects

2. Asian American populations have unique cancer disparities.

- Cancer is the leading cause of death in most Asian American ethnic groups
- Asian American women who have never smoked have the highest rates of lung cancer compared to all other racial and ethnic groups
- Breast cancer rates are rapidly increasing among Asian American women, especially among recent immigrants and those under 50 years old

3. We know relatively little about the causes of cancer across Asian American populations.

- Historically, research in Asian Americans has been underfunded
- Most studies do not collect detailed information about immigration histories
- Anti-Asian discrimination contributes to many health risks, but the connection to cancer remains understudied

We will launch the first national cohort of Asian American adults for the study of cancer in 2024.

We envision ASPIRE (Asian American Prospective REsearch) to:

- Follow more than 50,000 men and women over time
- Capture information ranging from structural and social drivers of health to genetic and biological factors

ASPIRE is funded by the National Cancer Institute and led by researchers at UCSF, UC Irvine, UC Davis, UCLA, Cedars-Sinai, Temple University, Jefferson University, and University of Hawaii.

The ultimate vision of ASPIRE is to serve as an expansive, contemporary resource, advancing our understanding of cancer and achieving health equity in Asian American populations.

NEXT 2024 ARCH MEETING

Thursday, August 15, 2024 from 3-4:30 PM PST featuring speakers

- Dr. Dale Dagar Maglalang from NYU Silver School of Social Work who will be speaking on “Variance in Cardiovascular Health Indicators by Asian American Ethnicity”
- Dr. Sunny Pak of On Lok Pace Powell Center who will be speaking on “Building Sustainable Access to Chinese Medicine for Healthy Aging”

ABSTRACTS REVIEWS

Compiled by Janet Chu

March 31, 2024 to June 30, 2024

ARCH Members Abstracts

- Tsoh and colleagues examined patterns of cigarette smoking and their association with the ongoing use of other substances in women who experience housing instability:
<https://pubmed.ncbi.nlm.nih.gov/38761684/>
- Meyer, Tsoh, Park and colleagues examined changes over approximately a 1-year period in discrimination experiences attributable to being AAPI and factors associated with worse mental health outcomes: <https://pubmed.ncbi.nlm.nih.gov/38929045/>
- Fukuoka, Nguyen TT, Tsoh, Jih and colleagues assessed the feasibility and acceptability of a 5-week intervention using a mobile phone app with an accelerometer program to promote physical activity among Chinese-, Tagalog-, or Vietnamese-speaking Americans:
<https://pubmed.ncbi.nlm.nih.gov/38857065/>
- Sabado-Liwag, Sy, Tsoh, Choi, Kwan, and colleagues reported on Asian American and Native Hawaiian and Pacific Islander Visibility and Data Equity: <https://pubmed.ncbi.nlm.nih.gov/38547462/>
- Chu, Sarkar, and colleagues conducted a systematic review and meta-analysis to investigate the association between language discordance and hospital readmission and ED revisit rates.
- Kanaya and colleagues identified profiles of serum metabolites reflective of plant-based diets of varying quality and examine associations with cardiometabolic risk and type 2 diabetes:
<https://pubmed.ncbi.nlm.nih.gov/38901635/>
- Kanaya and colleagues determined time to recovery following SARS-CoV-2 infection and identified factors associated with recovery by 90 days: <https://pubmed.ncbi.nlm.nih.gov/38884994/>
- Kubo, Kanaya, and colleagues examined pubertal timing among Asian American, Native Hawaiian, and Pacific Islander children and adolescents by disaggregating ethnic subgroups:
<https://pubmed.ncbi.nlm.nih.gov/38739393/>
- Kanaya and colleagues assessed the distribution of cardiovascular health metrics and association with incidence and progression of coronary artery calcium among South Asians in the Mediators of Atherosclerosis in South Asians Living in America (MASALA) study compared with other race/ethnic groups from the Multiethnic Study of Atherosclerosis (MESA):
<https://pubmed.ncbi.nlm.nih.gov/38583288/>
- Kanaya and colleagues derived metabolite risk scores for ectopic adiposity and assess associations with incident type 2 diabetes in South Asians: <https://pubmed.ncbi.nlm.nih.gov/38245659/>
- Kanaya, Gomez, and colleagues summarized the limited but growing literature, with a focus on structural and social determinants of health factors, from seven longitudinal cohort studies with substantial AANHPI samples: <https://pubmed.ncbi.nlm.nih.gov/38109517/>
- Kanaya and colleagues explored heterogeneity in the effect of type 2 diabetes on dementia incidence in a diverse cohort of Asian American and non-Latino White older adults:
<https://pubmed.ncbi.nlm.nih.gov/38949483/>
- Kanaya and colleagues assessed if religion/spirituality moderate the effects of childhood trauma on adult depressive symptoms among a sample of South Asians in the USA:
<https://pubmed.ncbi.nlm.nih.gov/38600425/>
- Yoo and colleagues explored family support dynamics among adult children and their parents diabetes with type 2 diabetes among Chinese and Filipino Americans:
<https://pubmed.ncbi.nlm.nih.gov/38720112/>
- Yoo and coauthors examined remembering the “comfort women” intergenerational Asian American care work in a content analysis of the transcript and video of the 2015 San Francisco Board of Supervisors public hearing on the establishment of a memorial for comfort women:
<https://studentreview.hks.harvard.edu/remembering-the-comfort-women-intergenerational-asian-american-care-work/>

- Yoo and colleagues explored on the role of filial piety in dyadic recruitment of Chinese American parents with type 2 diabetes and their adult children: <https://pubmed.ncbi.nlm.nih.gov/36927285/>
- Yoo and colleagues present the development of an ethnic studies faculty learning community: <https://www.aapinexus.org/2024/04/03/article-building-a-culture-of-care/>
- Yoo, Maglalang and coauthors reported on a qualitative exploration of the continuum of help-seeking among Asian American breast cancer survivors: <https://pubmed.ncbi.nlm.nih.gov/37532433/>
- Kim and colleagues present the DAWN (Describing Asian American Well-Being and Needs in Cancer) Study protocol to understand the supportive care needs of Chinese-, Vietnamese-, and Korean-descent (CVK) patients with metastatic cancer: <https://pubmed.ncbi.nlm.nih.gov/38648633/>
- Kim and colleagues examined whether nativity moderated the paths from racial/ethnic discrimination to private and public regard to mental health problems among Vietnamese American youth: <https://pubmed.ncbi.nlm.nih.gov/36315616/>
- Phan L and colleagues examined visual attention to features of social media marketing for disposable e-cigarettes and related product perceptions: <https://pubmed.ncbi.nlm.nih.gov/38923723/>
- Nguyen N and colleagues compared the number of cigarettes smoked on different days based on co-use patterns of cigarettes and alcohol or cannabis: <https://pubmed.ncbi.nlm.nih.gov/38547786/>
- Nguyen N and colleagues aimed to classify co-use patterns based on temporal proximity and describe preferred products and motives for each pattern in order to improve co-use surveillance: <https://pubmed.ncbi.nlm.nih.gov/38281461/>
- Meyer and colleagues conducted a scoping review of disparities in Alzheimer's disease and Alzheimer's disease related dementias healthcare, including issues of access, quality, and outcomes for racial/ethnic minoritized persons living with dementia (PLWD) and family caregivers: <https://pubmed.ncbi.nlm.nih.gov/38265164/>
- Nguyen P and colleagues identified factors independently associated with angiography performed within 6 months of randomization: <https://pubmed.ncbi.nlm.nih.gov/38629312/>
- Gomez and colleagues examined associations of neighborhood stressors and allostatic load in women with breast cancer recruited into the Pathways Study: <https://pubmed.ncbi.nlm.nih.gov/38896063/>
- Gomez and colleagues explored the perspectives of Black patients on the use and impact of the internet for their prostate cancer care: <https://pubmed.ncbi.nlm.nih.gov/38366884/>
- Gomez and colleagues explored bivariable associations of discrimination and changes in health behaviors and healthcare utilization among Asian American women during COVID-19: <https://pubmed.ncbi.nlm.nih.gov/37882970/>
- Carroll and colleagues assessed the association of depressive symptoms and contraception decisions in perinatal individuals: <https://pubmed.ncbi.nlm.nih.gov/38583583/>
- Misra and colleagues estimated the network connections and bridge centrality statistics to identify nodes that may influence trauma types and psychotic symptoms: <https://pubmed.ncbi.nlm.nih.gov/38876004/>
- Misra and colleagues examined how the quality of family member interactions associates with changes in shared food purchasing, preparation, and consumption: <https://pubmed.ncbi.nlm.nih.gov/38867005/>
- Misra and colleagues used the phenotyping data from a case-control study (NeuroGAP-Psychosis) in Uganda investigating the genetic and environmental risk factors for psychosis spectrum disorders: <https://pubmed.ncbi.nlm.nih.gov/38687810/>
- Misra and colleagues report on psychiatric healthcare experiences of South Asian patients with severe mental illness diagnoses in New York City: <https://pubmed.ncbi.nlm.nih.gov/39046623/>
- Mukherjea and colleagues publish a scoping review on assessing structural racism measures on health outcomes of Asian Americans, Native Hawaiians, and Pacific Islanders: <https://pubmed.ncbi.nlm.nih.gov/38539020/>
- Singh and colleagues explored ATF3 as a neuron-specific biomarker for spinal cord injury and ischaemic stroke: <https://pubmed.ncbi.nlm.nih.gov/38649772/>
- Park and colleagues examined the association between chronic conditions and disability of Vietnamese-original older immigrants/refugees in Houston, Texas by comorbidity clusters: <https://pubmed.ncbi.nlm.nih.gov/37249829/>

- Mahadevan and colleagues explored Ustekinumab and Vedolizumab safety and clearance in pregnancy with Inflammatory Bowel Disease: <https://pubmed.ncbi.nlm.nih.gov/38878846/>
- Mahadevan and colleagues characterized the microbial and metabolic consequences of ileal resection, the most common Crohn's disease surgery: <https://pubmed.ncbi.nlm.nih.gov/38750900/>
- Mahadevan and colleagues explored the Crohn's Disease Exclusion Diet as Treatment for Medication-Refractory Disease: <https://pubmed.ncbi.nlm.nih.gov/38555328/>
- Bui and Lau published an invited commentary on suicide rates among Asian American and Pacific Islander youths: <https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2821493>
- Chen CH and colleagues describe that the cleavage of Hsp70.1 causes lysosomal cell death under stress conditions: <https://pubmed.ncbi.nlm.nih.gov/38859931/>
- Tam and colleagues examined whether negative attitudes toward drinking mediated associations between ethnic enclave residence and alcohol outcomes among Mexican American young adults in Southern California: <https://pubmed.ncbi.nlm.nih.gov/38880996/>
- Tam and colleagues examined: (1) past 12-month heavy episodic drinking (HED) and total alcohol volume consumption among non-Hispanic White (NHW), Black, Hispanic, and Asian men and women from ages 12 through 41, and (2) age-varying associations of race and ethnicity with drinking: <https://pubmed.ncbi.nlm.nih.gov/38829485/>
- Tam and colleagues examined at-risk drinking prevalence rates among US adults with hypertension, diabetes, heart condition or cancer and assessed differences by gender and, among adults aged 50 and older, by race and ethnicity: <https://pubmed.ncbi.nlm.nih.gov/37219733/>
- Tam and colleagues assessed individual- and contextual-level correlates of secondhand harms from cannabis use and considered whether cannabis legalization support, along with cannabis user status, predicted such harms: <https://pubmed.ncbi.nlm.nih.gov/38662514/>
- Galen and colleagues assessed whether a letter is non-inferior to telephone genetic counseling to inform participants with no personal or family history of cancer of their normal results: <https://pubmed.ncbi.nlm.nih.gov/38190737/>
- Galen and colleagues investigated genetic counseling students' communication during sessions with Black or White standardized patients (SPs) and the extent to which communication was associated with SP race or student scores on the Race Implicit Association Test (IAT): <https://pubmed.ncbi.nlm.nih.gov/38847325/>
- Chen I and colleagues aimed to characterize the pharmacokinetic properties of primaquine and its major metabolites in G6PD-deficient subjects: <https://pubmed.ncbi.nlm.nih.gov/38773528/>
- Shim and colleagues provided investigator and researcher perspectives on and questions about the assumed value of return of results in precision medicine research: <https://pubmed.ncbi.nlm.nih.gov/37962912/>
- Zamora and colleagues pilot tested a person-centered, interprofessional intervention to improve identification and management of functional impairment among older adults in Veterans Affairs (VA) primary care practices: <https://pubmed.ncbi.nlm.nih.gov/38739582/>
- Karliner and colleagues examined how anti-Asian hate impacts older Asians' mental, social, and physical health: <https://pubmed.ncbi.nlm.nih.gov/38801317/>
- Karliner and colleagues elicited clinician perspectives on barriers/facilitators of using eConsults for deprescribing among older adults within a university health network: <https://pubmed.ncbi.nlm.nih.gov/38941059/>
- Karliner and colleagues aimed to further our understanding of characteristics associated with having a caregiver present at a primary care visit, and better understand the specific roles family caregivers engage in to support older Chinese and Latino primary care patients: <https://pubmed.ncbi.nlm.nih.gov/38851670/>
- Karliner and colleagues evaluated the validity of a new rating tool, the Physician Oral Language Observation Matrix (POLOM)[™], in assessing medical students' oral communication with Spanish-speaking standardized patients (SPs): <https://pubmed.ncbi.nlm.nih.gov/37670071/>
- Somsouk and colleagues described the effect of mailed outreach on FIT completion among patients aged 45-50 in a safety net healthcare system: <https://pubmed.ncbi.nlm.nih.gov/38822978/>
- Somsouk and colleagues explore whether Propofol improved polyp detection during colonoscopy: <https://pubmed.ncbi.nlm.nih.gov/38629962/>

- Khalili and colleagues evaluated clinician-level factors contributing to underuse of HCC surveillance in patients with cirrhosis: <https://pubmed.ncbi.nlm.nih.gov/38743424/>
- Chao M and colleagues designed and piloted a series of mindfulness-based group medical visits (MB-GMVs), embedded into comprehensive cancer care, for racially and ethnically diverse patients in cancer treatment: <https://pubmed.ncbi.nlm.nih.gov/38895040/>
- Chao M and colleagues conducted semi-structured interviews with community midwives providing care in birth centers and home settings in Oregon and California: <https://pubmed.ncbi.nlm.nih.gov/38590170/>
- Sudhinaraset and colleagues adapted and validated a person-centered abortion care (PCAC) scale for medication abortions that was developed in a global South context (Kenya) for use in the United States: <https://pubmed.ncbi.nlm.nih.gov/38754758/>
- Sudhinaraset and colleagues aimed to investigate how integrating support persons in maternity care is associated with multiple dimensions of the quality of maternity care: <https://pubmed.ncbi.nlm.nih.gov/38872129/>
- Sudhinaraset and colleagues conducted the Research on Immigrant Health and State Policy (RIGHTS) Study, developing a population-based survey of Asian and Latinx immigrants in California (n = 2010) that measured 23 exclusionary experiences under health care and social services, education, labor/employment, and immigration enforcement policies: <https://pubmed.ncbi.nlm.nih.gov/38905924/>
- Raj M and colleagues described patients' comfort with clinicians sharing information about social determinants of health: <https://pubmed.ncbi.nlm.nih.gov/38393613/>
- Raj M and colleagues sought to understand family caregivers' experiences and challenges navigating and managing their older Asian American relative's diet: <https://pubmed.ncbi.nlm.nih.gov/37991403/>
- Raj M and colleagues discuss policies related to offering culturally inclusive foods in long-term care and hospital facilities and proposes priority areas for integrating culturally inclusive foods in these facilities through policy and practice: <https://pubmed.ncbi.nlm.nih.gov/38158177/>
- Kim M and colleagues described self-reported attention and responses to cigarette package labels at the end of a two-week randomized trial of cigarette package labeling configurations: <https://pubmed.ncbi.nlm.nih.gov/38887598/>
- Kim M and colleagues reported differential responses to cigarette package labeling alternatives among adults who smoke: <https://pubmed.ncbi.nlm.nih.gov/38850013/>
- Kim M and colleagues reported heated tobacco product use frequency, smoking quit attempts, and smoking reduction among Mexican adult smokers: <https://pubmed.ncbi.nlm.nih.gov/38813582/>
- Kim M and colleagues reported themes in e-liquid concept names as a marketing tactic: <https://pubmed.ncbi.nlm.nih.gov/36171148/>
- Burke and colleagues reported the acceptability and feasibility of survivorship group medical visits for breast cancer survivors in a safety net hospital: <https://pubmed.ncbi.nlm.nih.gov/38724720/>
- Nguyen TT and colleagues aimed to quantify associations between built environment characteristics and traffic collisions in the USA: <https://pubmed.ncbi.nlm.nih.gov/38844338/>
- Nguyen TT and colleagues utilized innovative computer vision methods alongside Google Street View images to characterize neighborhood built environments across Utah: <https://pubmed.ncbi.nlm.nih.gov/38708409/>
- Nguyen TT and colleagues examined how racism influences life experiences from the perspectives of Asian & Pacific Islander, Black, Latina, and Middle Eastern women: <https://pubmed.ncbi.nlm.nih.gov/38596122/>
- Nguyen TT and colleagues aimed to understand how Asian American and Pacific Islander, Black, Latina, and Middle Eastern women experience racism-from personal perceptions and interactions to coping mechanisms and methods of protection: <https://pubmed.ncbi.nlm.nih.gov/36917397/>
- Sarkar and colleagues examined how time constraints affect primary care physicians' work experiences and careers: <https://pubmed.ncbi.nlm.nih.gov/38687477/>
- Sarkar and colleague wrote a viewpoint about using artificial intelligence to improve primary care for patients and clinicians: <https://pubmed.ncbi.nlm.nih.gov/38345801/>
- Tung WC and colleagues evaluated (a) perceived barriers and influential others trusted for advice regarding HPV vaccination and (b) factors (i.e. HPV vaccination, acculturation) related to barriers and

influential advisors among 18- to 26-year-old Chinese students attending U.S. colleges:

<https://pubmed.ncbi.nlm.nih.gov/37906530/>

- Tseng and colleagues aimed to identify the key risk factors that lead to subtypes of physical frailty assessed by walking speed and grip strength among community-dwelling Japanese individuals, stratified by the presence of musculoskeletal diseases (MSDs) and age group:
<https://pubmed.ncbi.nlm.nih.gov/39031835/>
- Jia and colleagues compared the rates of advance care documentation and life-sustaining treatment between Chinese American and White American ICU decedents:
<https://pubmed.ncbi.nlm.nih.gov/38574875/>
- Jia and colleagues compared the use and delivery of palliative care in the last year of life between ethnically Chinese and non-Chinese adults: <https://pubmed.ncbi.nlm.nih.gov/38926319/>
- Tseng and colleagues discuss the importance of invasive electrophysiology study for diagnosis of wide complex tachycardias: <https://pubmed.ncbi.nlm.nih.gov/38852223/>
- Qamar and colleagues highlighted research gaps in the area of college food insecurity and provide rationale for the research community to focus on these gaps going forward:
<https://pubmed.ncbi.nlm.nih.gov/37158045/>
